

CreaTec uses DirectPart with Alumide on EOSINT P 380, to manufacture door openers

Door opener

Requirement:

- prototype of a door opener for a sliding train door

Solution:

- laser-sintering on EOSINT P 380 system with Alumide®
- used as DirectPart® for direct usage

Result:

- easy to finish
- feels like metal
- looks like metal

laser-sintered prototype of a door opener
